

Patient Name : Vikas Gandhi
Age / Sex : 52 Y / M
Referred By : Dr. ASHISH TYAGI
Centre : GHAZIABAD

Lab No : GZB25062838
Registration On : 15-Jun-25 08:01
Patient ID : UKKD.0000138009

Ultrasound KUB

Approved On: 15-Jun-25 11:29

ULTRASOUND KUB

Right kidney is normal in size (~ 93 x 44 mm) shape and echotexture. Corticomedullary differentiation is maintained. No evidence of hydronephrosis is seen. **A calculus measuring ~ 5.5 mm is seen at mid pole.**

Left kidney is normal in size (~ 96 x 50 mm) shape and echotexture. Corticomedullary differentiation is maintained. No evidence of hydronephrosis is seen. **A calculus measuring ~ 5.0 mm is seen at lower pole.**

Urinary bladder is seen in distended state. No evidence of calculus or mass lesion is seen. Wall thickness is normal.

Prevoid volume measures ~ 155 cc. Post void volume measures ~ 52 cc (significant).

Prostate appears enlarged in size and measures ~ 44 cc in volume. No obvious focal lesion is seen.

IMPRESSION: ULTRASOUND KUB REVEALS:

--> **BILATERAL RENAL CALCULUS.**

--> **GRADE II PROSTATOMEGALY WITH SIGNIFICANT POST VOID RESIDUAL URINE.**

ADVISED: CLINICAL, URINE R/M & SERUM PSA CORRELATION.

Investigations have their limitations. Solitary investigations never confirm the final diagnosis of disease. It only helps in diagnosing the disease in correlation to the clinical symptoms. Not meant for medico legal purposes.

Dr. Dev Kumar
Consultant Radiologist
M.B.B.S., M.D. (Radio-Diagnosis)
UPMC Reg. No.: 84832

In case of any discrepancy due to typing error, kindly get it rectified immediately. This is professional opinion, not a diagnosis.

Hb A1c

EDTA Whole Blood Sample

Accession No: ED01409834 Collected On: 15-Jun-25 08:01 Received On: 15-Jun-25 12:30 Approved On: 15-Jun-25 15:47

Observation	Result	Unit	Biological Ref. Interval	Method
HbA1C	8.0	%	4.8-5.7	HPLC
90 Day Average Blood Glucose	182.9	mg/dl	90 - 120	Calculated

Interpretation as per American Diabetes Association (ADA) Guidelines

Reference Group	Non diabetic adults ≥ 18 years	At risk (Prediabetes)	Diagnosing Diabetes	Therapeutic goals or glycemic control
HbA1c in %	4.0-5.6	5.7-6.4	≥ 6.5	< 7.0

Note:

- Presence of Hemoglobin variant and /or conditions that affect red cell turnover must be considered particularly when the HbA1c result does not correlate with the patient's blood glucose levels.
- Factors That Interfere With HbA1c Measurement:** Hemoglobin variants, elevated fetal hemoglobin (HbF) and chemically modified derivatives of hemoglobin (e.g. carbamylated Hb in patients with renal failure) can affect the accuracy of HbA1c measurements
- Factors That Affect Interpretation Of HbA1c Results:** Any condition that shortens erythrocyte survival or decreases mean erythrocyte age (e.g., recovery from acute blood loss, hemolytic anemia, Hbss, HbCC, and HbSC) will falsely lower HbA1c test results regardless of the assay method used. Iron deficiency anemia is associated with higher HbA1c
- Since HbA1c Reflects long term Fluctuations in the blood glucose concentration, a diabetic patient who is recently under good control may still have a high concentration of HbA1c. Converse is true for a diabetic previously under good control but now poorly controlled.
- Target goals of $< 7.0\%$ may be beneficial in patients with short duration of diabetes, long life expectancy and no significant cardiovascular co-morbid conditions, targeting a goal of $> 7.0\%$ may not be appropriate.
- Any condition that shortens erythrocyte survival such as sickle cell disease, pregnancy (second and third trimesters), hemodialysis, recent blood loss of transfusion , or erythropoietin will falsely lower HbA1c results regardless of the assay method
- In patients with HbA1c level between 7-8%, Glycemark (1,5 Anhydro-glucitol) test may be done to identify those with more frequent and extreme hyperglycemic excursions.

Remarks: Please correlate results with clinical conditions.

Conditions Of Reporting

- ▶ The report results are for information and interpretation for your referring doctor. Reports are to be correlated with the patient's clinical history.
- ▶ Biological Reference Range/Interval is suggested for your Gender and Age on the basis of available literature. All reference ranges are to be reconsidered by physician's advice for your specific care.
- ▶ This Medical Report is a professional opinion, not a diagnosis.
- ▶ The report will carry the name and age provided at the time of registration. To maintain confidentiality, certain reports may not be e-mailed at the discretion of the management.
- ▶ All the notes and interpretation beneath the pathology result in the report provided are for educational purpose only. It is not intended to be a substitute for physician's consultation.
- ▶ Results of tests may vary from laboratory to laboratory and in some parameters from time to time for the same patients. Test results and reference range may also vary depending on the technology and methodology used. Laboratory test results may also vary depending on the age, sex, time of the day sample has been taken, diet, medication and limitation of modern technology.
- ▶ In case of any unexpected or alarming test results, please contact us immediately for re-confirmation, further discussion, clarifications and rectifications, if needed.
- ▶ In case of any discrepancy due to typing error, kindly get it rectified immediately.
- ▶ Neither HOD or its employees/representatives assume any liability or responsibility for any loss or damage that may be incurred by any person as a result of interpreting the meaning of this report.
- ▶ Test results are not valid for medico legal purposes.
- ▶ In case of any issues or suggestions about your test results, please email us on quality@houseofdiagnostics.com
- ▶ The courts (forums) at Delhi shall have exclusive jurisdiction in all disputes/claims concerning the tests and the results of the tests. Our liability is limited to the amount of investigations booked with us.

Facilities Available

Radiology

- ▶ 3T MRI & 1.5T MRI
- ▶ CT Scan
- ▶ Digital X-Ray
- ▶ Mammography
- ▶ Open / Standing MRI
- ▶ Bone DEXA Scan

Pathology

- ▶ Biochemistry
- ▶ Immunoassay
- ▶ Hematology
- ▶ Clinical Pathology
- ▶ Serology
- ▶ Microbiology

Nuclear Medicine

- ▶ **India's First** Simultaneous PET-MRI
- ▶ Whole Body PET/CT Scan
- ▶ DTPA / DMSA Renal Scans
- ▶ Thyroid Scan
- ▶ Whole Body Bone Scan
- ▶ HIDA Scan • Rest MUGA

Cardiology Investigations

- ▶ ECG (Electrocardiogram)
- ▶ Echocardiography
- ▶ TMT
- ▶ Stress Echocardiography
- ▶ Stress Thallium

Neurology Investigations

- ▶ EEG - ElectroEncephaloGram
- ▶ EMG - ElectroMyoGraphy
- ▶ NCV - Nerve Conduction Velocity
- ▶ VEP - Visual Evoked Response
- ▶ SSEP

Dental Imaging

- ▶ CBCT - Cone Beam CT Scan
- ▶ OPG - OrthoPantomoGram
